### SCO® (Stabilised Complex Oxychloro) THE ADVANCED PRESERVATIVE TECHNOLOGY

**SCO®** is an oxidative-type preservative and a mixture of chlorine dioxide, chlorite and chlorate. When exposed to light, **SCO®** dissociates into components naturally found in the human tears such as sodium chloride, oxygen and water, making it very well tolerated.

#### What are the benefits of SCO®

- **SCO®** only remains in its original form when inside the bottle.
- As soon as it leaves the bottle as part of a drop it reacts with light and rapidly dissipates into components naturally found in human tears such as sodium chloride, oxygen and water without causing any cellular damage to the ocular surface.
